

Endeavour 40

A STATEMENT OF EXCELLENCE

Main Cabin

Private Galley

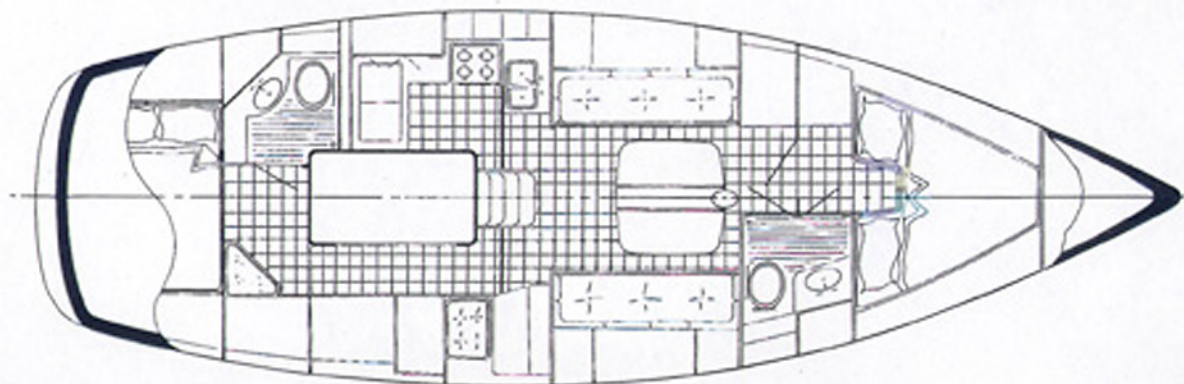

Endeavour 40

Features a centercockpit, aft cabin layout which is uncompromising in any area.

The main cabin is large and open. It features a most elegant feeling of festivity and warmth. The adjoining galley is on a separate level. It is out of the traffic flow and is large enough to be a "live aboard" galley. A fresh water foot pump, although incidental, is part of this thinking in addition to the hot and cold pressure water, deep double sinks and Adler-Barbour refrigeration.

The chart table encompasses a proper size chart area as well as a good method of storing charts. Excellent thinking is evident in housing instruments in the chart area.

INTERIOR

The Endeavour 40 has its own engine room with plenty of space in and around the engine. Access to all areas of the engine are excellent. The engine room is fully insulated.

The private owner's stateroom aft features a queen size berth, hanging lockers, chest of drawers and private head with shower. This cabin is particularly large and comfortable.

On deck, a dry cockpit is surrounded by a clean, uncluttered deck and house. Four large hatches and 16 opening ports with screens provide light and ventilation below.

The Endeavour 40 is a powerfully built, fast and stable hull which you can sail anywhere in the world. She is simply a new statement of excellence in performance cruising.
